Product Description:
Plastic cement is a specialty cement manufactured at CalPortland’s Oro Grande plant particularly for plaster and stucco applications. Plastic cement is interground with plasticizing agents designed to enhance the desirable properties of Portland Cement – Based Plaster.

A few of the properties necessary for performance of a cement plaster product are adhesion (the ability to stick to a substrate), cohesion (the ability to resist sagging and delamination) and workability (the ability to place, shape, and work the material).

Product Applications:
Plaster and stucco applications. Packaged plaster and finish-coat stucco products.

Benefits:
Plastic cement is specifically formulated for use in most types of plaster and stucco applications using plasticizers for workability and moisture retention:
• Superior board life
• Excellent workability
• Improved pumpability
• Cohesive nature

Quality:
Established in 1891, CalPortland is proudly advancing into its second century of providing unsurpassed quality, with a full product line of superior performing cement products and solutions for your greatest construction challenges.

From our state-of-the-art cement production facilities we manufacture product using only high quality raw materials and strict quality control procedures. CalPortland is recognized as the leader in quality cement production and innovation.
Product Data Sheet

Plastic Cement
Plaster and Stucco Applications

Standards:
Plastic cement conforms to ASTM C1328 standard specification for Plastic (Stucco cement).

Product Precautions:
Plastic cement is intended solely for use in Portland Cement - Based Plaster and stucco applications.

For precise product application it is important to refer to the project specifications.

Contact with cement (including unhardened concrete, mortar, wet cement, or cement admixtures) can cause skin irritation, severe chemical burns, or serious eye damage. Avoid contact with eyes and skin. Seek immediate medical attention if you have persistent or severe discomfort. In case of eye contact, flush with plenty of water for at least 15 minutes. Consult a physician immediately.

For other precautions please refer to the CalPortland Portland Cement SDS Report.

Availability:
Plastic cement is available in bulk quantities at:
14909 National Trails Highway
Oro Grande, CA 92368
2825 W. Washington, Stockton, CA 95203

Sacked products are available through select building materials suppliers.
